**Synthetic Grass
Sporting and
Recreational Surfaces**

Company Profile:

Since 1982, ABS Sport Surfaces personnel have been leaders in the design, specification and installation of synthetic grass sporting and recreational surfaces. With backgrounds in sport at club, state and Olympic levels, they understand the balance between sports performance and investment.

ABS Sport Surfaces has set high standards for innovative, cost-effective design and construction of installations ranging from small to very large multi-use surfaces.

Products and Services:

ABS Sport Surfaces designs, supplies and installs synthetic grass surfaces which are all-weather, no dust or mud, hard-wearing, multi-use with high utilisation and low maintenance for both indoor and outdoor use.

ABS Sport Surfaces services schools, colleges, universities, sporting bodies and associations, councils, developers and the private sector.

Composition and Manufacture:

Synthetic grass systems can include shock-absorbing underpads or rubber granule infill for optimum performance and safety. Different yarn types can be incorporated for specific end-use requirements.

ABS Sport Surfaces operates Australia wide and has completed a number of international installations.
